EDUCATION

Gettysburg College

B.S. Computer Science and Physics

Gettysburg, PA

Expected May 2027

- **Relevant Coursework:** Algorithms, Probability and Statistics, Linear algebra, Data Structures, Operating Systems, Intro to Machine learning, Databases: PostgreSQL and MySQL, Assembly Language
- **GPA:** 3.81

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, TypeScript, C#, Kotlin, SQL
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Flask, .NET, LangChain, REST APIs, WebSockets
- **Cloud & Infrastructure:** AWS: ECS, RDS, ElastiCache, GCP, Docker, CI/CD, Redis, MongoDB

PROFESSIONAL EXPERIENCE

Intuit

Data Engineer Intern

May 2026 – Aug 2026

Mountain View, CA

- Engineered a stream processing pipeline development plugin for Claude Code and Cursor that orchestrates multi-agent AI workflows across the full software development lifecycle — from architecture design to release readiness.
- Accelerated Apache Flink stream-processing development velocity from days to minutes by architecting automated safety gates for schema compatibility, PII detection, and artifact verification.
- Automating end-to-end (E2E) testing for a core attributes enrichment processor across 4 critical marketing data pipelines, integrating automated validation into the CI/CD workflow.

Google

Associate Software Developer Intern

May 2025 – Aug 2025

San Francisco, CA

- Developed a high-performance Windows desktop client for Google Play Games on PC, improving launch times by 10% and reducing installer size by approximately 70 MB.
- Enhanced web infrastructure and cross-process communication between the desktop client and the Progressive Web App, reducing memory use, CPU load, and launch time.
- Implemented WebSocket-based IPC layer using C# and TypeScript, enabling seamless state synchronization between native desktop components and the PWA frontend.

PROJECTS

RxConnect (TypeScript, Next.js, React, PostgreSQL, REST APIs, Redis, Docker)

- Architected a multi-tenant digital health platform connecting doctors, pharmacies, and patients, supporting real-time prescription routing and role-based access across 3 portals using a Nx monorepo, Next.js 14, and NestJS microservices.
- Built a scalable backend with PostgreSQL + PostGIS for geospatial pharmacy search and BullMQ and Redis for asynchronous SMS notifications, deployed on AWS (ECS Fargate, RDS, ElastiCache) with automated CI/CD pipelines.

AgroMesh (React Native, Expo, Gemini AI, MongoDB, AWS)

- Led development of an AI-powered mobile platform providing real-time crop health insights via Gemini AI image analysis, with automated disease detection and treatment recommendations for smallholder farmers.
- Architected a microservices-driven backend on AWS + MongoDB, enabling scalable data ingestion and real-time API-driven analytics, and deployed CI/CD pipelines to automate integration testing and rollouts.

HONORS & AWARDS

2025 Generation Google Scholar (Institute of International Education): Awarded \$10,000 in recognition of my academic achievements, leadership, and commitment to diversity, equity, and inclusion.

2025 John Alfred Hamme Award (Gettysburg College): Recognized for my exceptional demonstration of leadership, loyalty, kindness, courtesy, and true democracy within Gettysburg College.
